MEMORANDUM FOR: Chairman, Customer/Standards Committee

STAT   FROM:

                  Special Assistant to the Executive Director

       SUBJECT: Survey of Information Technology Test-beds

    1. During its offsite meeting last November, the Information Systems Board heard about numerous projects being conducted by the directorates to evaluate new information technology. There does not appear to be any concerted effort to coordinate these projects or to share the results throughout the Agency.

    2. We believe that everybody would benefit from greater awareness of information technology test-beds, and that the Customer/Standards Committee is in the best position to achieve this goal. We would like to have the Committee survey its members to identify information technology test-beds which were completed recently, are in progress, or are planned. The Information Systems Board would like to hear the results of the survey and their implications during its meeting on 4 August.

    3. I hope that the Committee will be able to fit this topic into its already crowded agenda.
